PROFILE

As a former social media manager, I'm no stranger to adapting to rapidly changing technology and am invigorated by the challenge of consistently evaluating how a new tool or feature may create opportunities to transform how a challenge is addressed. My unique ability to identify opportunities to extend solutions beyond one business unit or discipline became my hallmark in many previous roles. More seasoned problem solvers from across the organization helped me appreciate the power of deploying the right tools in the right way to tackle complex business problems.

As my skills began to grow, so did my passion for the technology driving it all. When I discovered web development, I could not imagine doing anything else for the remainder of my career. During my time at NSS, I'm not only gaining the technical skills needed to solve the problems I'm faced with. More importantly, I'm learning how to channel my natural curiosity into business changing solutions to everyday challenges.

INDIVIDUAL PROJECTS

Simplified Supper

Simplified Supper is intended to make meal planning easy, allowing the user to see at a glance what they have coming up so grocery shopping is a breeze. By looking at the meals the user has planned for the week, Simplified Supper provides suggested recipes based on the percentage of ingredients that can be repurposed from your chosen meals.

Tools: React, React Router, JSON Server, Semantic UI for React, Yummly API, React Big Calendar, Moment.js
